For guidance on what product you need to offer optimum protection, see our specification chart.

See page 64

HAND PROTECTION

Hands are vulnerable to all sorts of hazards in the working environment. Increasingly gloves are being fitted to the environment that they are being used in to allow the wearer comfort and protection.

If gloves are poorly maintained they will offer less effective protection from the environment they are being worn in. It is important to check the hand protection that you are using before every wear.

BE SURE TO CHOOSE THE RIGHT GLOVES

Ref.	Icon	Description
EN 388		This standard applies to all kinds of protective gloves giving protection from mechanical risks, in respect of physical problems caused by abrasion, blade cut, puncture, tearing or impact cut. This standard also covers risk of electrostatic discharge.
EN 374		This standard specifies the capability of gloves to protect the user against chemicals and/or microorganisms.
EN 511		This standard applies to gloves which protect the hands against convective and contact cold.
EN 407		This standard specifies thermal performance for protective gloves against heat and/or fire.
EN 659		This standard defines performance requirements for gloves designed to protect fire fighters against heat and flames.
EN 421		This standard lays down test methods and performance criteria for gloves offering protection against ionising radiation and radioactive contamination.
EN 455		Medical gloves for single use. If a glove is to be used for food handling, it is required to carry either the words 'for food use' or this symbol.

Please note specifications stated are valid at time of print and may be subject to change
Please note welding gauntlets are not suitable for foundry work and handling molten metals

Thermal Hazards EN 407	Performance Level
Burning behaviour	0-4
Contact heat	0-4
Convective heat	0-4
Radiant heat	0-4
Small splashes of molten metal	0-4
Large splashes of molten metal	0-4

Mechanical Hazards EN 388	Performance Level
Abrasion resistance	0-4
Blade cut resistance	0-5
Tear resistance	0-4
Puncture resistance	0-4

EN 511: Cold	Performance Level
Convective cold	0-4
Contact cold	0-4
Water proofness	0-1

EN 407 Contact Temperature Threshold Time		
Performance Level	T°C	Seconds
1	100	>15
2	250	>15
3	350	>15
4	500	>15

Ansell

11-600 HYFLEX LITE

Designed for light and delicate applications in dry environments that require maximal levels of dexterity. Like a second skin, they offer comfortable, exact handling of small objects. They also ensure product protection from glove-generated debris and cross-product contamination.

- General Handling
- 6, 7, 8, 9, 10, 11
- 1x case = 12 packs,
1x pack = 12 pairs

3131

Product Code: 0111-600

Ansell

11-616 HYFLEX

Designed for a wide range of lightweight applications in dry or slightly oily environments, ideal for workers who need a higher level of fit, touch and precision than that offered by their current gloves.

Also ideal for applications where cotton gloves or no gloves at all are used despite the risk of scrapes, blisters and minor injuries.

- General Handling
- 6, 7, 8, 9, 10, 11
- 1x case = 12 packs,
1x pack = 12 pairs

2121

Product Code: 0111-616

Ansell

11-618 HYFLEX ULTRA LITE

Designed for a wide range of lightweight applications in dry or slightly oily environments, ideal for workers who need a higher level of touch and precision than that offered by their current gloves.

Also ideal for applications where cotton gloves or no gloves at all are used despite the risk of scrapes, blisters and minor injuries.

- General Handling
- 6, 7, 8, 9, 10, 11
- 1x case = 12 packs,
1x pack = 12 pairs

3121

Product Code: 0111-618

Ansell

11-800 HYFLEX FOAM

A highly versatile solution for precision assembly and general handling, it provides the perfect balance between comfort, dexterity and protection.

Advanced Knitting Technology allows increased stretch and flexibility in high-stress areas: the hand operates more freely, improving comfort and reducing hand fatigue.

- General Handling
- 6, 7, 8, 9, 10, 11
- 1x case = 12 packs,
1x pack = 12 pairs

3131

Product Code: 0111-800

Ansell

27-600 HYCRON

Three times more durable than heavy-duty leather. Unique Ansell nitrile formulation. Offers superior resistance to sharp and abrasive materials. Stronger and more flexible than PVC. Also provides an excellent barrier to grease and oil, and does not degrade like leather or cotton. Made without silicone. Guaranteed clean for metals and motor manufacture. Wide selection of styles, lengths and sizes.

- General Handling
- 8, 9, 10, 11
- 1x case = 12 packs,
1x pack = 12 pairs

4221

Product Code: 0127-600

Ansell

27-602 HYCRON

Three times more durable than heavy-duty leather. Unique Ansell nitrile formulation. Offers superior resistance to sharp and abrasive materials. Stronger and more flexible than PVC. Also provides an excellent barrier to grease and oil, and does not degrade like leather or cotton. Made without silicone. Guaranteed clean for metals and motor manufacture. Wide selection of styles, lengths and sizes.

- General Handling
- 8, 9, 10
- 1x case = 12 packs,
1x pack = 12 pairs

4221

Product Code: 0127-602

Ansell

32-105 HYNIT

Special nitrile formulation unites excellent resistance to abrasion with remarkable flexibility. Liquid-repellent impregnation repels oil, grease and dirt. Wide selection of styles, lengths and sizes.

- General Handling
- 7, 8, 9, 10
- 1x case = 12 packs,
1x pack = 12 pairs

Product Code: 0132-105

Ansell

47-200 EASY FLEX

The coolness and comfort of cotton - but with far superior grip. Makes it easier and safer to handle smooth objects like boxes or appliances. Coating only on fingers and palm. Protects the working area, but leaves the back of the hand free to breathe. Much better resistance to snags, puncture and abrasion. Nitrile coating repels oil and grease. Lasts five times longer than an ordinary cotton glove.

- General Handling
- 6 1/2, 7, 8, 9, 10
- 1x case = 12 packs,
1x pack = 12 pairs

Product Code: 0147-200

Ansell

47-400 HYLITE

A versatile alternative to cotton, light leather and PVC. Special nitrile formulation provides an excellent combination of flexibility, mechanical resistance and oil repellency. Natural hand shape - easier to wear for long periods. Available in a wide range of styles, lengths and sizes. Silicone-free. Ensures cleanliness of metal sheets: important in steel and motor industries.

- General Handling
- 7, 8, 8 1/2, 9, 10
- 1x case = 12 packs,
1x pack = 12 pairs

Product Code: 0147-400

Ansell

47-402 HYLITE

A versatile alternative to cotton, light leather and PVC. Special nitrile formulation provides an excellent combination of flexibility, mechanical resistance and oil repellency. Natural hand shape - easier to wear for long periods. Available in a wide range of styles, lengths and sizes. Silicone-free. Ensures cleanliness of metal sheets: important in steel and motor industries.

- General Handling
- 7, 8, 9, 10
- 1x case = 12 packs,
1x pack = 12 pairs

Product Code: 0147-402

Ansell

48-100 SENSILITE

Ansell's SensiLite® range of industrial gloves is designed for light applications that require good levels of comfort and abrasion resistance. Offering precise handling of small objects in dry or light oily environments, SensiLite® is the practical choice when you are looking for dexterity. SensiLite® provides enhanced safety, dexterity and durability compared to other glove options often used in the same applications.

- General Handling
- 6, 7, 8, 9, 10, 11
- 1x case = 12 packs,
1x pack = 12 pairs

Product Code: 0148-100

Ansell

76-200 STRINGKNIT

Can be worn on their own or as liners. Good value product protection. No seams to rub or irritate. Permits a longer, more comfortable wear, with no weak points which might split or fray. Stringknit construction allows good air flow to the hand. Hands don't become hot and sweaty. Ambidextrous. No need to pair, therefore more economical. All styles washable at 40°C. Will not shrink, stiffen or lose their shape. 76-200 and 76-202: nylon versions, softer, more comfortable, flexible and low lint.

- General Handling
- 7, 8, 9, 10
- 1x case = 12 packs,
1x pack = 12 pairs

Product Code: 0176-200

More hygienic
for the wearer.
Better value for
the provider.

Ansell

11-624 HYFLEX

The special formulation of the polyurethane coating gives the gloves flexibility and fit, as well as a secure grip on dry to slightly oily pieces for sure handling in a wide range of environments. The liner is made with a yarn structure containing Dyneema®, the world's strongest fiber™. It therefore offers strong cut resistance for the safe handling and assembly of sharp pieces.

- Cut Protection
- 6, 7, 8, 9, 10, 11
- 1x case = 12 packs,
1x pack = 12 pairs

Product Code: 0111-624

Ansell

11-630 HYFLEX

The liners of the gloves have a yarn structure that contains an optimal rate of HPPE. This offers high levels of cut resistance, for a safe use in controlling, handling and assembly applications involving contacts with sharp pieces. The specific formulation of the polyurethane dipping provides a secure grip on dry or slightly oily pieces. The PU formulation also increases abrasion resistance on the gloves' work surface.

- Cut Protection
- 6, 7, 8, 9, 10, 11
- 1x case = 12 packs,
1x pack = 12 pairs

Product Code: 0111-630

Ansell

70-205 KEVLAR

Designed to provide superior mechanical strength in light to heavy-duty handling and production applications. In addition to the very high cut resistance that comes from Kevlar® reinforcement, it offers enhanced comfort and dexterity for your workforce. Thanks to the Neptune® coating the glove fibres repel liquids, avoiding damage to the Kevlar® strands and extending glove life. The reinforced thumb welt increases abrasion resistance also adding to glove durability.

- Cut Protection
- 7, 8, 9, 10
- 1x case = 12 packs,
1x pack = 12 pairs

Product Code: 0170-205

Ansell

70-225

Comfort and sure grip. Constructed from high-tech Kevlar® para-aramid short fibres, the gloves give improved sensitivity and fit. The seamless construction avoids irritation and the use of short fibres offers extra comfort. In addition the PVC dots on both sides of the glove provide sure/extra grip (specific models, see specifications). Exceptional cut resistance with dexterity. The 100% Dupont Kevlar® construction offers a very high cut resistance to weight ratio. The use of Terry loop technique enhances heat insulation. The resulting thicker-walled glove offers high shock absorption without losing dexterity.

Cost effectiveness.

Thanks to the Neptune® coating the gloves' fibres repel liquids, avoiding damage to the Kevlar® strands and extending glove life. The reinforced thumb welt increases abrasion resistance also adding to glove durability. The ambidextrous gloves are fully washable and can be re-used many times.

- Cut Protection
- 7, 8, 9, 10
- 1x case = 12 packs,
1x pack = 12 pairs

Product Code: 0170-225

Ansell

11-920 HYFLEX

Microscopic channels in the glove coating guide away the oil, resulting in a secure glove-to-surface contact. This allows the wearer to handle small and medium-sized components lightly coated with oil or lubricant in all confidence. Protects skin from oil contamination. Incorporating all the essential features of the Ansell HyFlex® range, users appreciate the outstanding fit, comfort and dryness, as well as the glove's excellent dexterity and tactility.

- Oil Protection
- 6, 7, 8, 9, 10, & 11
- 1x case = 12 packs,
1x pack = 12 pairs

Patented Ansell Grip Technology™

Product Code: 0111-920

Ansell

15-554 PVA

One of the only gloves suitable for handling strong organic solvents. Virtually inert in aromatic and chlorinated solvents. Comfortable anatomical glove with pre-curved fingers and winged thumb. Easier to manipulate and less tiring to wear. Soft two-piece knitted liner. Cushions the hand and absorbs perspiration.

-  Chemical Protection
-  AQL 1.0 (EN374)
-  9, 10
-  1x case = 12 packs,
1x pack = 1 pair

Product Code: 0115-554

Ansell

87-190 YELLOW ECONOHANDS

Specially treated to reduce the risk of allergic reactions. Thickness of 0.35 mm. Provides outstanding sensitivity. Minimal risk only. Excellent price/quality ratio.

-  Chemical Protection
-  AQL 1.5 (EN374)
-  S/M/L/XL
-  1 bag = 1 pair,
1 master bag = 12 bags,
1 case = 12 master bags

Product Code: 0187-190

Ansell

87-950 EXTRA BLACK LATEX

50% thicker than standard flock lined gloves. Extremely high resistance to many ketones, salts, detergents, alcohols, alkalis and fats. 100% natural rubber with no fillers. Excellent resistance to mechanical hazards plus increased chemical protection. Chlorinated. For better grip and increased chemical resistance. 100% cotton flock lining makes a heavy glove softer and more comfortable to wear. Helps absorb perspiration.

-  Chemical Protection
-  AQL 0.65 (EN374)
-  6 1/2-7, 7 1/2-8, 8 1/2-9,
9 1/2-10, 10 1/2-11
-  1 bag = 1 pair,
1 master bag = 12 bags,
1 case = 12 master bags

Product Code: 0187-950

Ansell

GREEN SOLVEX

Available in a wide selection of lengths, thicknesses, sizes and linings, Ansell Sol-Vex® nitrile gloves are designed to deliver optimal results in wet or dry work environments where chemical resistance is crucial. Fully reusable, with an unequalled abrasion resistance, it provides superb comfort for the wearer.

Sol-Vex® nitrile gloves are the ideal choice for safe handling in a wide range of work environments where harsh chemicals are present.

The unlined version of the glove has no inner cotton flocking, reducing risk of lint contamination and making it ideal for production areas sensitive to the introduction of external impurities.

The reversed lozenge finish further enhances levels of grip.

The sandpatch finish gives the gloves a smooth surface that decreases indirect costs thanks to fewer rejects of fragile parts.

Ansell

92-600 TOUCH N TUFF

Further testing of the TouchNTuff® by a certified body on an even wider range of chemicals confirms that it resists a greater variety of industrial chemicals for longer periods than any other nitrile disposable glove.

Manufactured from nitrile, TouchNTuff® offers up to four times the puncture resistance of comparable natural-latex gloves, and three times the resistance of similar neoprene gloves.

It contains no natural rubber proteins, which means no risk of Type I allergies for the wearer. Primary skin irritation studies and Insult Patch tests have also shown no evidence of risk from irritation or allergic contact dermatitis.

With a unique "Thin Nitrile Technology" formulation, these gloves offer easy donning and strong grip in wet or dry conditions.

The glove is highly versatile and suitable for many different uses.

Product Code: 0111M582

KRYTECH 586

High-performance protection for intricate handling in reasonably clean environments. Optimal cut resistance, level 5. A visible indicator in blue textile to easily identify the cut-performance level in the workplace. Performance of the gloves guaranteed after 3 cleaning cycles in washing machine.

Special features: Uses HDPE fibres ensuring excellent cut resistance with reduced thickness for good dexterity.

Cut Protection

6, 7, 8, 9, 10, 11

1 pair/bag - 12 pairs/bag
- 48 pairs/carton

4543
ISO 13997:
18 N (1835 g)

Product Code: 0111M586

KRYNIT GRIP AND PROOF 599

It repels oil penetration, reduces dermatitis while ensuring cut protection. Nitrile Grip and Proof coating, which ensures an excellent grip in oily environments. It also reduces muscle fatigue and boosts your productivity. Long lasting and cost-effective: washable, performance guaranteed after 5 cleaning cycles. No need to change as often as oilproof. 23-28 cm in length, knitted wrist.

Cut Protection

8, 9, 10, 11

1 pair/bag - 12 pairs/bag
- 48 pairs/carton

Cut and oilproof up to knuckle.

4543
ISO 13997:
